Chennai

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience working on enterprise and defense-grade systems. Experienced in React, Java, Spring Boot, and distributed data pipelines using Kafka, MySQL, and MongoDB, with hands-on work on code generation utilities, database integration services, and production-ready web applications in agile environments.

WORK EXPERIENCE

CDAC | June, 2025 – Current

- Worked on the **WESEE (Indian Navy) project**, developing a **Code Generation Utility** supporting **IDL/XML inputs** with language bindings for **Traditional C++, Modern C++, and Python**.
- Implemented a **Database Integration Service (DIS)** using **Kafka, MySQL, and MongoDB** to support **real-time data flow, automatic storage, and database synchronization**.
- Contributed to **DDS middleware development and enhancements** using **eProsima Fast DDS** for reliable **real-time distributed communication**.

Hema Enterprises Pvt Ltd | Feb, 2024 – Mar, 2025

- Developed **Convex**, a **project management tool**, implementing **drag-and-drop task management, dynamic forms, DataGrid components**, and secure authentication using **React** and **RESTful APIs**.
- Led end-to-end frontend development of **Swoos**, an **out-of-stock product tracking system**, building **real-time dashboards** and **plugin-based tables** with static column scrolling.
- Built **NERAM**, a **timesheet management system**, implementing **login modules, filters, dynamic dialog boxes, and data tables**, improving workflow efficiency and usability.

TECHNICAL SKILLS

Frontend Development

- React.js, Next.js, TypeScript, JavaScript(ES6+), HTML5, CSS3
- UI Libraries: Material-UI, Ant Design
- State Management: Redux, Context API
- Responsive Design & UI Optimization

Backend Development

- Java, Spring Boot
- RESTful APIs & API Integration

Databases

- MySQL, MongoDB

Tools & Technologies

- Git, GitHub, GitLab, Postman, Swagger, Kafka
- Testing: Jest, Unit Testing

EDUCATION

BACHELOR OF TECHNOLOGY (CSE)

Rajiv Gandhi College of Engineering and Technology
2019 - 2023
CGPA: 7.32

PROJECTS

INDEDDS – A *DDS-based middleware using eProsima Fast DDS for reliable real-time distributed communication*.

Tech Stack: Java, C++, Kafka, MySQL, MongoDB, eProsima Fast DDS

Key Contributions:

- Developed a **Code Generation Utility** supporting **IDL/XML inputs** with **Traditional C++, Modern C++, and Python bindings**.
- Built a **Database Integration Service (DIS)** using **Kafka, MySQL, and MongoDB** for real-time data flow.
- Contributed to **DDS middleware enhancements** using **eProsima Fast DDS**.

CONVEX – A *project management tool for task handling, sprint planning, and progress tracking*.

Tech Stack: React.js, TypeScript, Material-UI, Spring Boot, MongoDB

Key Contributions:

- Implemented **drag-and-drop functionality** and **dynamic forms** for task and subtask management.
- Developed **DataGrid components** and **secure login/authentication** with RESTful API integration.

SWOOS – A *real-time system for tracking and managing out-of-stock products*.

Tech Stack: React.js, Ant Design, Spring Boot, MongoDB

Key Contributions:

- Built **real-time dashboards** and **plugin-based tables** with static column scrolling for inventory tracking.
- Integrated and optimized **RESTful APIs** to improve data accuracy and application performance.

NERAM – A *timesheet platform for logging work hours and managing approvals*.

Tech Stack: Next.js, TypeScript, MUI, MySQL Workbench

Key Contributions:

- Developed **login/authentication, filters, and data tables** for timesheet tracking and approvals.
- Implemented **dynamic dialog boxes** and optimized UI performance using **Next.js**
